ABOUT LUKJAN

Lukjan Metal Products has been manufacturing high quality sheet metal pipe, duct and fittings to the Wholesale HVAC Industry since 1964. Lukjan started in a small garage in Conneaut, Ohio and quickly expanded into its now current flagship 190,000 square foot plant approximately 4 miles away in the same town. Seeing expanding opportunity in the southern market, Lukjan purchased a 205,000 square foot building in Kings Mountain, N.C. and began production operations, August 2006. This greenfield operation expanded Lukjan's service footprint to now cover over twenty states. Having weathered the worst housing market crash in history, Lukjan continued its growth plans in the Midwest markets with the acquisition of another family owned business, Midwest Ducts in March 2016. This facility added another 90,000 square feet and further extended Lukjan's reach to over 28 states. Continued growth in the economy and housing market strength presented another opportunity in the Great Plains market with the purchase of a fourth facility in Sidney, Nebraska in June 2017. Another greenfield operation, Lukjan Great Plains adds another 200,000 square feet of manufacturing capacity and provides Lukjan with access to the HVAC Wholesaler market in over 37 states and Canada.

Even with its rapid growth, Lukjan remains a family owned and operated business following three simple principles established by its founders, Anatol and Natalia Lukjanczuk: **Provide the best quality product at competitive prices backed by exceptional customer service.** These same principles live on today in all aspects of our business under the leadership of Dan Lukjanczuk and Elena Lukjanczuk-Kelly.

METAL SHIPPING RACKS

Lukjan utilizes both 4' and 8' metal shipping racks for high volume duct and pipe purchases. A summary of our rack policy is as follows:

1. Racks are provided as a service to our wholesalers/distributors for the handling and storage of **Lukjan product only.**
2. Racks NOT returned within a reasonable timeframe will be invoiced to the wholesaler/distributor of record.
3. Racks sent to customer sites are the responsibility of the wholesaler/distributor of record and will be billed at time of shipping.
4. Racks are currently valued at **\$275.00** (4') and **\$475.00** (8') and may change based on prevailing replacement costs.

Customers are asked to contact Lukjan customer service to arrange pick-up when racks are cleared. Customers are asked to neatly stack cleared racks and provide safe and easy access for Lukjan drivers.

DAMAGED GOODS

Product **received** in damaged conditioned can be returned for full credit. Customers have up to 3 days from the product delivery date to contact customer service and arrange for an RMA (Return Memo

Authorization) and schedule pick-up of defective material. Credit will be issued upon inventory of returned goods.

RETURNS AND RESTOCKING

Lukjan will, **at its discretion**, accept returns for credit provided the product is in re-salable condition and is a standard part. Custom made metal products will not be accepted. All returns are subject to a minimum **25%** restocking and handling fee. Some restock charges may be higher depending on the specific product volume.

ELECTRONIC DATA INTERCHANGE (EDI)

Lukjan utilizes EDI for ordering, acknowledgement, invoicing and ASN. Any customer interested in utilizing EDI can contact our customer service team or their Lukjan sales representative.

ELECTRONIC INFORMATION

Lukjan asks, as a business courtesy, that any electronic data provided by Lukjan to its customers (pricing, product specifications, etc.) be managed in a confidential manner.

DISCOUNTS/TERMS

Please inquire regarding discount programs for early payments.

PACKING SLIP/INVOICE

Items on Lukjan Packing Slips and Invoices match the sequential order of the customer purchase order and if requested, can include the customer part number providing easy product receiving and billing reconciliation

PRODUCT IDENTIFICATION

Lukjan provides box labeling that includes a product bar code, product description, customer name/address, customer PO#, order date, customer part number and PO sequence number.

PRODUCT CODES/PRICING

All items in the Lukjan Catalog are identified with a Lukjan Product Code. The Product Code is defined for each item to provide an accurate means to price and order product. A complete catalog price list of over 15,000 items is available on-line at **lukjan.com**

Example:

RP05xxyyzzz RP050630060 6" 30GA
5' Round Pipe, Unboxed

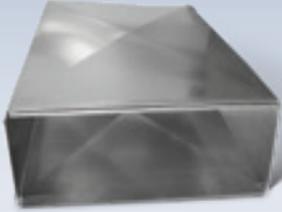

Where: RP05 = Round Pipe, Unboxed
xx = 06 Pipe Diameter
yy = 30 Gauge
zzz = 060 Length

LUKJAN RESERVES THE RIGHT TO MAKE ADJUSTMENTS AND/OR CHANGES TO POLICIES, PRICES AND PRODUCT AVAILABILITY AT ITS DISCRETION WITHOUT NOTICE.

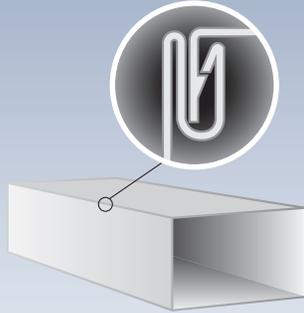

DUCT AND DUCT FITTINGS

Fittings list DRIVE dimension first, SLIP second while Duct lists SLIP first and DRIVE second.

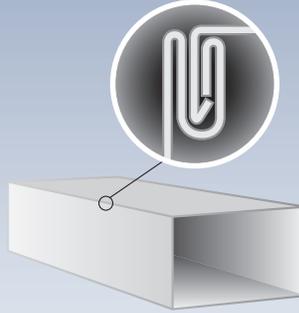

Slip and Drive w/Cross-break

THOR lock

Button Lock

E-Lock

BUTTONLOCK is our standard duct offering providing a strong, tight seam connection.

ELOCK offers the same strength and tight seal but eliminates the raw edge along the longitudinal male seam providing a smooth edge reducing potential worksite or warehouse injuries. The ELOCK also adds rigidity to the duct surface.

RACK QUANTITIES

	4 FT. & 5 FT. DUCT		8 FT.	
	X 8	X 10	X 12	X 8
8	150			180
10	150	90		150
12	150	120	120	150
14	160	120	120	160
16	120	90	90	120
18	120	80	80	120
20	100	80	80	100
22	100	80	80	100
24	100	80	80	100
25	100	80		100
26	100			100
28	80			80
30	80			80
32	80			80

RECTANGULAR DUCT

Seam Lock Options:

Buttonlock, E-Lock and Slide Lock
Joint Connections: S&D or THOR

DT01_{xyyyzza} 26GA

DT02_{xyyyzza} 28GA

DT03_{xyyyzza} 24GA

xx = 08-30 (Slip dimension)
yy = 08, 10, 12 (Drive dimension)
zz = 36, 48, 60, 96 (Length)
a = Blank: Buttonlock, E: Elock, T: THOR
Call for special sizes and prices.
Standard is Button Lock with S&D

SQUARE THROAT

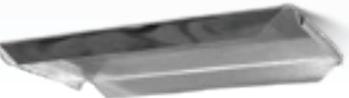

ROUND THROAT

END CAPS, 2" EXT.

DX45_{yyxx} (512)

Used with THOR lock duct
yy = 04-12 (Drive dimension)
xx = 08-32 (Slip dimension)

END CAPS

DX44_{yyxx}

yy = 04-18 (Drive dimension)
xx = 08-30 (Slip dimension)

OFFSET START COLLAR

DX31_{yyxx}

yy = 08,10,12 (Drive dimension, duct side)
xx = 08-32 (Slip dimension)
Standard offset 3"

RECTANGULAR START COLLAR

DX33_{yyxx}

yy = 04,06,08,10,12,14,15,18 (Drive dimension)
xx = 08-32 (Slip dimension)

DRIVE CLEATS

DX10_{xxxxy}

xxx = 06-120 (Length)
yy = 28, 26, 24 (GA)

"S" CLEATS

DX12_{xxxxy}

xxx = 06-120 (Length)
yy = 28, 26, 24 (GA)

STANDING "S" CLEATS

DX13_{xyyyzz}

x = 1 (1" Hem) or 5 (5/8" Hem)
yyy = 060, 096, 120 (Length)
zz = 24 (GA, Blank = 26)

Example: DX135120 = 5/8" x120" 26GA

Lukjan can install Turning Vanes on any duct fitting. Call for more info.

SQUARE THROAT

ROUND THROAT

HORIZONTAL (LONGWAY) ELBOW

DX25_{yyxx}

yy = 08,10,12,14, (Drive dimension)
xx = 08-32 (Slip dimension)

HORIZONTAL (LONGWAY) ANGLE

DX27_{yyxx}

yy = 08,10,12,14 (Drive dimension)
xx = 08-32 (Slip dimension)

DUCT AND DUCT FITTINGS (CONT.)

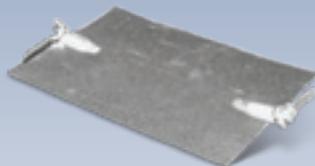

FLEXIBLE DUCT CONNECTOR

DX36_{yyxx}

yy = 08-20 (Drive dimension)
xx = 08-24 (Slip dimension)

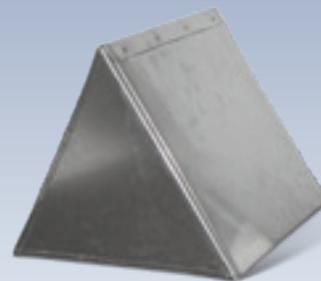

Isolates furnace vibration from duct system.

RECTANGULAR DUCT DAMPERS

DX50_{yyxx}

yy = 8, 10, 12 (Drive dimension)
xx = 08-50 (Slip dimension)

TRIANGLE BOX

DX47_{xxyyzzaa}

xx = 10-24 (Edge 1 dimension)
yy = 10-24 (Edge 2 dimension)
zz = 10-24 (Edge 3 dimension)
aa = 06-24 (Height)

Used in Flexduct distribution systems

DUCT REDUCERS

DX41_{yyxxbbaa}

yy = 06-18 (Drive dimension, larger end)
xx = 08-30 (Slip dimension, larger end)
bb = 06-18 (Drive dimension, smaller)
aa = 08-28 (Slip dimension, smaller)

Options: Standard is Flat one side
C = Centerline reducer

TRANSITION

DX82_{yyxx}

xx = 08-38 (Slip dimension)
yy = 8, 10, 12 (Drive dimension)
Add "D" for Transition with Damper

Clip version

DUCT ADAPTER

DX80_{aaayyz}

aa = 02, 04, 06, 08, 10, 12 (Duct reduction)
yy = 8, 10, 12 (Drive dimension)
z = C designates clips on long edge. Blank is raw edge

Example: 24x8 to 18x8
Need 6" reduction on 8" Drive = DX800608

REDUCERETTE

DX79_{aaayyz}

aa = 02, 04, 06, 08, 10, 12 (Duct reduction)
yy = 8, 10, 12 (Drive dimension)

Example: 24x8 to 18x8
Need 6" reduction on 8" Drive = DX790608

VERT ELBOW, RED. JUMPER BOOT

DX22_{yyxxbbaa}

yy = 08-10 (Drive)
xx = 10-16 (Slip)
bb = 10-16 (Drive)
aa = 10-16 (Slip)

SLEEVE EXTENSION

DX37_{xxyyzz}

xx = Width (02-20)
yy = Depth (06-24)
zz = Sleeve Length (in)

DUCT DAMPER SLEEVE

DX51_{xxyyzz} (Residential)

DX51CE_{xxyyzz} (Commercial; Pictured)

xx = 06-14 (Drive)
yy = 08-24 (Slip)
zz = Drive + 2" (Length)
Standard 24GA

DUCT REVERSE ELBOW

DX24_{yyxxbbaa}

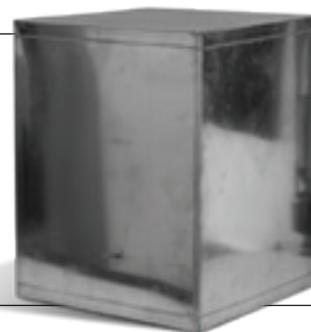

yy = 08 (Drive)
xx = 10-24 (Slip)
bb = 08 (Drive)
aa = 10-24 (Slip)

DISTRIBUTION BOX

DX48_{xxyyzz} Non-insulated

DX48_{xxyyzzRa} Insulated

xx = 12-20 (Side 1)
yy = 12-20 (Side 2)
Side 1 = Side 2 most common
zz = 12, 24, 36, 48 (Box Length)
a : 4 = 1", 6 = 1.5", 8 = 2" (Insulation value)
ex: DX48161636R8 16x16-36" w/2" Insulation

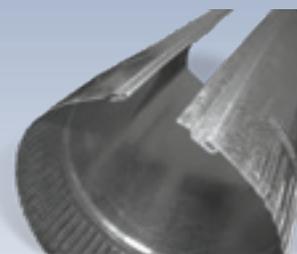

ROUND PIPE

DIAM.	RACK QUANTITIES	
	5 FT. ROUND PIPE	
	UNBOXED	BOXED
3	550	
4	630	480
5	480	350
6	350	250
7	240	160
8	200	150
9	160	
10	150	
12	120	
14	80	

All sizes 10/Bundle except 3" at 5/Bundle.
4"- 8" Sizes Boxed or Unboxed.
All Sizes over 8" Unboxed.
Beaded Pipe Available.

Sealed pipe saves your customers time and money by eliminating the need to seal the longitudinal lock seam. Installation time, expensive tapes and mastic supplies are reduced providing a clean, high quality look.

UL Classified
Polymer-based
Sealant

SEALED ROUND PIPE

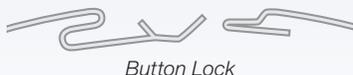

RP07xxyyzzz (All sizes unboxed)

xx = 04-16 (Diameter)
yy = 26, 24 (GA)
zz = 060 (Length only)

GALVANIZED ROUND PIPE

RP01xxyyzzz

RP05xxyyzzz (Unboxed 4" - 8")
xx = 03-32 (Diameter)
yy = 30, 28, 26, 24, 22 (GA)
zz = 012, 024, 036, 048, 060, 120 (Length)
Options: Buttonlock and Snaplock

Button Lock

Sealed Button Lock

Snap Lock

Sealed Snap Lock

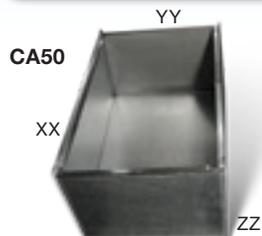

ASSEMBLED ROUND PIPE

RP05xxyyzzzA

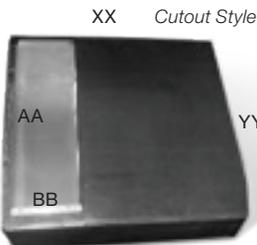

xx = 03-04 (Diameter)
yy = 30, 28, 26 (Gauge)
zzz = 120 (Length In.)
A = Assembled
Hammerlock and Crimped

aa = 24, 25 (Cutout Length)
bb = 08, 10, 12 (Cutout Width)
Example: CA40362824105
Support Box 36x28 w/24x10 cutout and 5" Filter Slot

FILTER FRAMES (1" FILTERS)

CA20xxyyz
xx = 14, 16, 20, 25 (Filter Height)
yy = 20, 24, 25, 30 (Filter Length)
z = A, B, C, D (Style)
A (Teeth Flange one side, Plain Flng other)
B (Teeth Flng one side, Flat other)
C (Plain Flng one side, Flat other) Standard
D (Plain Flange both sides)
Options: SD = Snap Door

FILTER FRAME BOX

CA74xxyyza
xx = 14-25 (Filter Height)
yy = 20-25 (Filter Length)
z = 3, 5, 6, 7 (Frame Box Width must be 2" larger than filter slot)
a = Filter Slot Width (Blank is 1")
3, 4 or 5)
Hemmed both faces standard.
Options: S = Swing Door
M = Magnetic cover (1" Filter only)

EX: CA74142553 - Filter Box 14x25-5" with 3" Filter Slot

FURNACE BOX

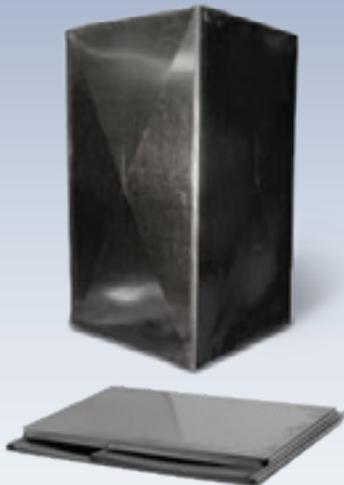

CA50xxyyzz
CA50Fxxyyzza w/Filter Slot
CA50STxxyyzza w/Sliding Filter Tray

xx = depth
yy = width
zz = height
a = filter width
(Blank = 1", 2 = 2", 3 = 3", etc.)

Door Options:

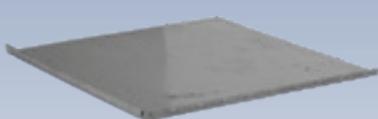

H = Hinged Door
M = Magnetic Door (1" filter only)
S = Swing Door

FURNACE/AIR HANDLER FITTINGS (CONT.)

PLENUM RAIL

PX16_{xyyy}
 xx = 10-28 (Plenum Width)
 yyy = 046 or 056 (Plenum Length)

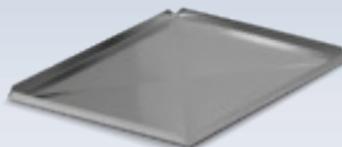

PLENUM CORNERS

PX20_{xxx}
 xx = 36, 60, 120 (Length)

SOLID COIL BOX

PX22_{xyyyz}
 xx = 16-24 (Box Width)
 yy = 20-28 (Box Depth)
 zz = 15-22 (Box Height)

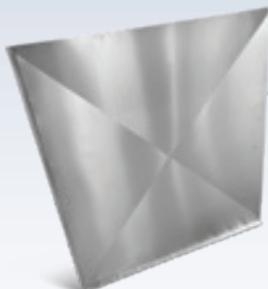

CUSTOM PLENUM TOPS

PX18_{xyy}
 xx = 10-28 (Plenum Width)
 yy = 12-36 (Plenum Length)

CUSTOM SIZED PLENUMS

PL10_{xyyyz}
 xx = 10-28 (Plenum Width)
 yy = 12-30 (Plenum Depth)
 zz = 12-60 (Plenum Height)
 Standard 4 sides, 1 cap, x-broke
Options: Double Top, Two Piece Designs, Flange In/Out, Hem, Fractional sizes end with A, B, etc.
Example: 16.5x20.5x48 = PL10162048A

UNIVERSAL PLENUM SIDE

PX14_{xxzz}
 xx = 10-28 (Plenum Width)
 zz = 12-60 (Plenum Height)

COLD AIR FRAMES

CA16_{xyyyz}
 xx = 10-40 (Opening width)
 yy = 04-24 (Opening height)
 zz = Overall frame width (16" or 24")
 Standard is 4" + opening width

UNIVERSAL PLENUM TOP

PX17_{xyy}
 Flat plain sheet metal no flanges or bends
 1616, 1620, 1624, 2020, 2024, 2424, 2430

ADJUSTABLE PLENUM KIT

PL13_{xyyyz}
 (4) Universal sides (PX14) and
 (1) Univ. Top (PX17)
 xxyy = 2020, 2024, 2525, 2626
 zz = 36 and 48 Lengths

Insulated Plenums available.
 See page 27

USER MANUAL HOLDER

CA9001
 9.75" H x 10" W

PLENUM TRANSITION

PL17_{xyyyaabbzz}
 xx = Smaller opening depth
 yy = Smaller opening width
 aa = Larger opening depth
 bb = Larger opening width
 zz = Height
 Ex: PL171320133805 13x20-13x38 - 5" H

UNIVERSAL FILTER FRAME BOX

Fits filter sizes 1" - 5" w/adj filter rails
CA74_{xxyyU}
 xx = 14-25 (Filter Height)
 yy = 20-25 (Filter Length)
 Frame Box Width is fixed at 7"
 Swing Door standard

SQ-RD MOBILE HOME BOX

Same as SQ-RD BOOT but with filter ledge on inside

RB55_{xyyyz}M
 xx = 03-21 (Width)
 yy = 06-30 (Depth)
 zz = 04-24 (Round Takeoff Diameter)
Options: Flange Out, RAW

Mobile Home Kits (MK) available and include filter, grill and butterfly damper

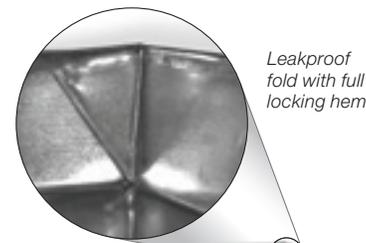

SQUARE-ROUND BOOT

RB55_{xyyyz}
 xx = 03-21 (Width)
 yy = 06-30 (Depth)
 zz = 04-24 (Round Takeoff Diameter)
Options: Flange Out, RAW, Offset Design

METAL DRAIN PANS

CA30_{xyyyza}
 xx = 20-38 (Width)
 yy = 24-80 (Length)
 zz = 26, 24 (GA)
 a = Blank (Standard w/ Drain Plug on long side)
 a = S (Drain Plug on short side)
 a = N (No Drain Plug)

Leakproof fold with full locking hem

FURNACE/AIR HANDLER FITTINGS (CONT.)

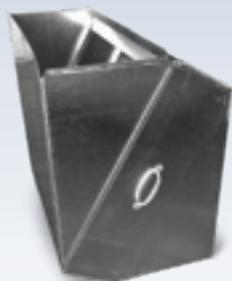

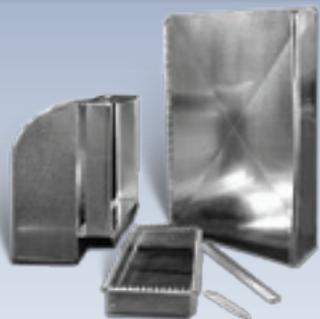

COLD AIR RETURN KITS

CA10_{xxyyaabb}

xx = Furnace cutout larger
yy = Furnace cutout smaller
aa = CA Drop Slip dimension
bb = CA Drop Drive dimension

KITS INCLUDE:

(1) Start Collar, (2) jts 32" Duct, (1) CA Boot, (6) S Cleats, (6) Drive Cleats

CA BOOT, SLANT FILTER

CA11_{aabbxxyy5}

CA11K_{aabbxxyy5 (KIT)}

aa = 25 (Drop slip)
bb = 10, 12, 15 (Drop drive)
xx = 25 (Furnace slip)
yy = 20 (Furnace drive)
Ex: CA11251025205 25x10-25x20 w/5" Filter Slot

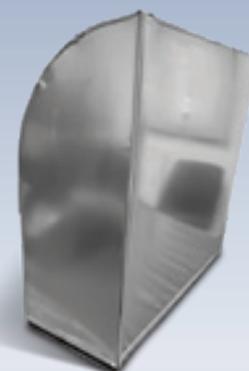

CA BOOT, NO THROAT

CA13_{aabbxxyy}

CA13K_{aabbxxyy (KIT)}

aa = 24 (Drop slip)
bb = 08, 10, 12 (Drop drive)
xx = 24 (Furnace opening)
yy = 16, 20 (Furnace opening)
Ex: CA1324082416 24x8 -24x16

CA BOOT, FLAT

CA14_{xxyy}

CA14K_{xxyy (KIT)}

aa = 20, 24, 25 (Drop slip)
bb = 08, 10, 12 (Drop drive)
Ex: CA142510 25x10 Drop, No furnace opening

COLD AIR RETURN BOOTS

CA12_{aabbxxyy}

xx = Furnace cutout larger
yy = Furnace cutout smaller
aa = CA Drop Slip dimension
bb = CA Drop Drive dimension

Return Air Boot Options:

Side Load Filter Slot is Standard or Top Load (T)
ROUND BACK ONLY

F = Flange w/adhesive to assist installation
M = Magnetic filter slot cover (1" only)
S = Swing Door
SD = Snap Door

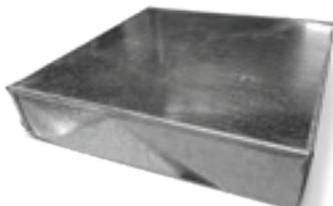

SUPPLY/RETURN AIR PRODUCTS

SUPPLY/RETURN AIR PAN, NO COLLAR

CA58_{xxyyzz}

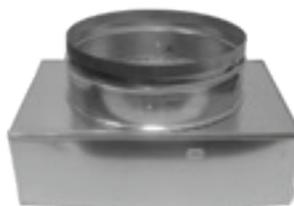

xx = 10-24 (Width)
yy = 10-24 (Length)
zz = 04-16 (Height, Standard = 4")

SUPPLY/RETURN AIR BOX - NO COLLAR

STRAIGHT BOXED PACKAGING

SHEET METAL STARTING COLLARS

Solid Ring RX10xxRG

SHORT START COLLAR WITH ADDED SOLID RING
 RX10xxRG No Crimp
 RX11xxRG Crimped
 xx = 04-40 (Diameter)

LONG STARTING COLLAR
 RX12xx
 RX13xx w/Damper
 xx = 04-36 (Diameter)
 6" Body Length
 Options: RG (Solid Ring)

SHORT STARTING COLLAR
 RX10xx No Crimp
 RX11xx Crimped
 xx = 04-40 (Diameter)

TABLOC LONG STARTING COLLAR W/ SERRATED FLANGE
 RX12Txx
 RX13Txx w/Damper (riveted)
 xx = 04-20 (Diameter)
 Ships nested. Quick tabloc wont release!

LONG ROTH STARTING COLLAR
 RX16xx
 Medium sized body (4" long)
 xx = 03-24 (Diameter)

GARY SHORT START COLLAR W/ INTEGRATED RING
 RX10Gxx No Crimp
 RX11Gxx Crimped
 xx = 4-16

FLEX CONNECTOR
 RX58xxzz
 xx = 03-24 (Diameter)
 zz = 30, 26 (GA)
 Used to join short pieces of flex.

CONNECTOR W/WAVEY WASHER
 RX58Rxx
 xx = 03-24 (Diameter)
 High-friction couplers allow damper adjustment from register opening.

ROUND END CAP
 RX21xxzz (421) No Crimp
 RX22xxzz (422) Crimped
 xx = 03-24 (Diameter)
 zz = 22, 24 (GA) Blank = 26GA

ROUND FLEX CONNECTOR
 DX36Rxx
 xx = 03-24 (Diameter)
 Provides isolation of furnace and air handler vibration and noise from round duct systems.

SHEET METAL TAKEOFFS AND SPIN-INS

COMMERCIAL DAMPER EXTENSION UNIT

RX30E02

2" 18GA Standoff Extension with 15 position locking high strength flame retardant polymer damper handle that indicates damper blade position. Works with 3/8" aluminum damper rod and slotted damper RX30C (sold separately)

COMMERCIAL DAMPER BLADE ASSEMBLY

RX30Cxx

xx = 06-18
Slotted damper blade with 3/8" damper rod (2) nylon bushings for air-tite seal. Locking regulator (RX30E02) sold separately.

All Commercial Adhesive Takeoffs utilize a 2" Standoff with 15 position locking damper regulator (RX30E02) and a 3/8" aluminum rodded damper blade with nylon bushings for a sealed, smooth damper rotation. After locking in place, damper will not loosen and freely rotate like standard dampers operating in commercial environments.

To purchase a set, order (1) 2" Extension Unit (RX30C02) and (1) Damper Blade Assembly (RX30Cxx)

Lukjan has extensive manufacturing capabilities available and can help design and build custom products and solutions for any job. Whether it's new home construction, retrofit or light commercial applications, Lukjan can build quality sheet metal products and develop solutions that can

save your customers custom fabrication costs, setup and installation time thereby giving them a competitive edge. Call us with your ideas and challenges and we'll see if we can develop a solution tailored for your market.

STEEL INFORMATION

Galvanized

Hot-dipped galvanized commercial steel is carbon steel sheet coated with zinc on two sides by the continuous hot-dipped process. This process results in a layer of zinc on each side of the steel sheet that is tightly adhering to the steel thru the formation of an iron-zinc alloy bonding layer that is formed by a diffusion process while the heated steel strip is in contact with the molten zinc. The galvanized coating is essentially pure zinc with trace amounts of aluminum (0.20 – 0.30%). The aluminum is added to improve the adhesion process between the zinc coating and the steel substrate.

Coating Weights are specified as G30, G60 and G90 and represent zinc weight (mass) for both sides of the galvanized sheet. G30 = 0.30 oz/ft², G60 = 0.60oz/ft² and G90 = 0.90 oz/ft². G30 is the most commonly used for residential HVAC and G90 used primarily in commercial applications.

Galvanneal

Galvanneal is similar to Galvanized in that they are both made by the hot-dip coating process. The main difference in the production process is that, to make a galvannealed coating, the strip is further heated by passing it through a furnace directly above the coating bath. By heating to approximately 1000 to 1050°F (538 to 565°C) and holding the strip at this temperature for a specific amount of time, the zinc coating alloys with iron by diffusion between the molten zinc and iron from the steel strip. The result is that the final product has a coating that is an alloy of approximately 90% zinc and 10% iron. The final iron concentration depends on the heating cycle since the total amount of diffusion is a function of the time/temperature cycle. One of the primary attributes of the galvannealed coating is that the surface accepts paint very readily and the zinc-iron alloy coating can be welded more easily than galvanized and the coating is harder than a galvanized coating and is thus more resistant to scratching and manufacturing damage.

Common Coating Weights are designated as A25, A40 and A60. (A25 = 0.25 oz/ft² both sides)

Galvalume

Galvalume steel is carbon steel coated with an aluminum zinc-alloy. The typical composition of the coating is 55% aluminum and 45% zinc. The coating is applied to the base metal in a continuous hot dip coating method. Galvalume is a product of choice for most agricultural, commercial, industrial and rural applications and thus not as economical for residential HVAC applications.. Under typical corrosive conditions, the coating generally will last much longer than a Galvanized coating of comparable thickness. Galvalume is two to four times as corrosion resistant as G90 coated steel in outdoor marine, rural, and industrial environments. Galvalume will maintain its bright appearance and reflectivity in long-term service at temperatures up to 600 degrees Fahrenheit. The aluminum-zinc alloy coating provides excellent atmospheric corrosion resistance in a wide range of environments under many diverse conditions. The alloy coating of aluminum and zinc gives a combination of long-term corrosion resistance and galvanic protection at scratches and cut edges. Galvalume sheet can be arc welded with the shielded metal-arc and gas metal-arc processes.

Coating Weights are defined as AZ-50, AZ-55 and AZ-60. (AZ55 = 0.55 oz/ft² both sides)

Stainless Steel

Stainless Steels are iron-base alloys containing Chromium. Stainless steels usually contain less than 30% Cr and more than 50% Fe. Stainless Steel is not a single metal but an alloy that is a material made from two or more separate elements alloyed or "melted" together. They attain their stainless characteristics because of the formation of an invisible and adherent chromium-rich oxide surface film. This oxide establishes on the surface and heals itself in the presence of oxygen. Corrosion resistance and mechanical properties are commonly the principal factors in selecting a grade of stainless steel for a given application.

Type 304 (18-8) is an austenitic steel possessing a minimum of 18% chromium and 8% nickel, combined with a maximum of 0.08% carbon. The 18% minimum chromium content provides corrosion and oxidation resistance. Type 304, or one of its modifications, is the material specified more than 50% of the time whenever a stainless steel is used.

Type 316 is also austenitic, non-magnetic, and thermally non-hardenable stainless steel like Type 304. What distinguishes Type 316 from Type 304 is the addition of molybdenum up to a maximum of 3%. The molybdenum gives 316 better overall corrosion resistant properties than Grade 304, particularly higher resistance to pitting and crevice corrosion in chloride environments.

AgION Anti-microbial Coated Steel

AgION is an anti-microbial compound containing as the name implies, silver IONS that react with moisture to inhibit mold and mildew growth. When the silver ions come into contact with bacteria and other microbes, their chemical interaction disrupts electron transfer and respiration, suppressing microbe growth on the product. The AgION anti-microbial compound is blended

into a paint system, which is applied to the steel using a continuous-roll coil coating process. The coating is cured at more than 400°F, eliminating VOC (volatile organic compound) emissions.

The compound can be applied to either carbon or stainless steel, coated on one or both sides. The AgION antimicrobial compound has been registered with the Environmental Protection Agency (EPA) for use in heating, ventilating and air conditioning components.

PVC Coated Steel

Polyvinyl chloride (PVC)-coated steel is used for fume exhaust, underslab, and underground duct systems. The PVC coating is applied to both sides of the steel with the exterior typically 4 mil thickness to provide maximum corrosion protection and an interior coating of one mil.

Black Coated Steel

Black coated steel is a standard 24GA steel with a high temperature, scratch resistant black paint coating one side. Various coatings exist but all provide added protection of the steel surface and some resistance to discoloration in higher heat applications.

Aluminum

Aluminum Alloy 3003-H14 is an excellent metal for general sheet metal work where only moderate strength but superior corrosion resistance is required. The terminology for the thickness of aluminum sheets does not use a Gauge number – like Galvanized or other carbon steel – it is instead requested by its' actual decimal thickness in inches. There are many alloys of Aluminum; 3003 is widely used as a general-purpose alloy for moderate-strength applications requiring good workability. The density of aluminum is approximately 1/3 that of galvanized steel.

LUKJAN IS A LONGSTANDING MEMBER OF THE AIR DISTRIBUTION INSTITUTE (ADI) AND PARTICIPATES IN OTHER ASSOCIATIONS DEDICATED TO THE ADVANCEMENT OF THE HVAC INDUSTRY.

LUKJAN METAL PRODUCTS FAMILY OF COMPANIES

LUKJAN NORTH

P.O. BOX 357
645 INDUSTRY ROAD
CONNEAUT, OHIO 44030
P: 440.381.8244 F: 440.381.8242
sales@lukjan.com

LUKJAN SOUTH

111 KINGS ROAD
KINGS MOUNTAIN, NC 28086
P: 704.734.0544 F: 704.734.0993
